NUMBER 1 JANUARY–FEBRUARY 1990

Special Issue: Intelligent Control

Sharpening the focus on intelligent control
H. Van Dyke and R. Judd 1

Reactive scheduling for a single machine: problem definition, analysis, and heuristic solution
Yuan-Geng Huang, L. N. Kanal and S. K. Tripathi 6

Uncertainty management in intelligent task planning of mobile robots
K. Ishii and S. Misra 13

Intelligent control of adhesive dispensing
R. Chandraker, A. A. West and D. J. Williams 24

The implications of natural language structure on the control of intelligent robotic systems
C. C. Wagner 35

A game-theoretic approach for co-operation control in multi-machine workstations
V. N. Rajan and S. Y. Nof 47

A multi-level/multi-layer architecture for intelligent shopfloor control
A. Jones and A. Saleh 60

NUMBER 2 MARCH–APRIL 1990

Editorial 71

Linking computer systems in a manufacturing company
J. S. Busby, D. G. Hey and D. Hutchinson 73

A knowledge-based approach to dynamic job-shop scheduling
F. Farhoodi 84

A framework for prismatic part-data generation—unit-machined loop concep
Rong-Kwei Li and Ming-Hwang Yu 96

Use of computer-based factory automation (CBFA) in West German companies
D. Boelzing 112

Feature recognition with a truth maintained process planning system
P. J. Herbert, C. J. Hinde, A. D. Bray, V. A. Launders, D. Round and D. M. Temple 121

Book reviews 133

NUMBERS 3 and 4 MAY–AUGUST 1990

Special Issue: ESPRIT

Editorial 137

Introduction to the ESPRIT programme
P. MacConaill 140

CIM–OSA Part 1: total enterprise modelling and function view
H. R. Jorysz and F. B. Vernadat 144

CIM–OSA Part 2: information view
H. R. Jorysz and F. B. Vernadat 157

CIM–OSA Part 3: CIM–OSA integrating infrastructure-the operational basis for integrated manufacturing systems
M. Klittich 168

Methods for exchange of finite element analysis data and integration of finite element analysis and prototype testing
J. Van Maanen and J. Leuridan 181

Computer-aided design of advanced control algorithms for industrial robotics: and overview of ESPRIT project SACODY
J.-L. Faillot 186

Project 477: pilot implementation of a production activity control (PAC) system in an electronics assembly environment
G. J. Lyons, J. Duggan and R. Bowden 196

Knowledge-based factory supervision: EP 932 results
W. Meyer and R. Isenberg 206

The use of an identification system for locating and tracking freight cars, plus its further development into an integrated routeing planning information system
A. Richtscheid 234

The application of CIM to welded fabrication
D. N. Waller and D. G. Canessa 241

Real-time imaging for arc welding
D. N. Waller, C. J. Foster and R. Wagner 249

Basic technologies for high-performance solid-state image sensors for CIM applications
G. Boucharlat, B. Dimitriadis, D. Herault, G. Raabe, F. Roy, Y. Thénoz, S. Zur Verth and C. Weijtens 261

NUMBER 5 SEPTEMBER–OCTOBER 1990

Editorial 273

Manufacturing systems engineering: the concept, its context and the state of the art
K. Hitomi 275

Concept definition of a logistics standard interface for CIM implementations
K.-J. Göbel, A. Hidde and R. Schwartz 289

The synthetic index algorithm: an improved cluster analysis procedure for machine cell formation
Sheh-Pang Wu and Pao-Long Chang 299

Graphical process description—views and diagrams
K. Mandel 314

Book reviews 328

NUMBER 6 NOVEMBER–DECEMBER 1990

Editorial 333

Rationalization of product structure achieved by part count minimization
A. Holbrook and P. Sackett 335

Scheduling and planning of electronics manufacturing operations: a case study of the MADEMA approach
R. Salonna 343

Knowledge-based decision-making for job shop scheduling
B. van der Pluym 354

An expert system for selecting attribute sampling plans
N. S. Fard and I. Sabuncuoglu 364

Object-oriented management planning systems for advanced manufacturing
D. H. Norrie, O. R. Fauvel and B. R. Gaines 373

Book reviews 379

Index 381
